## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1, claims 1-3 are drawn to a memory cell structure comprising first and second virtual grounding lines, and a cell transistor provides a first bit cell selected by signals of the word line and the first virtual grounding line and a second bit cell selected by signals of the word line and the second virtual grounding line (Fig.3);

Group 2, claims 4-15 are drawn to a memory cell structure having a grounding line, first and second virtual grounding lines, a first cell transistor with drain connected to bit line and gate connected to first word line, and a second cell transistor with drain connected to bit line and gate connected to second word line (Fig.4);

Group 3, claims 16-21 are drawn to a memory cell structure comprising a ground line, first and second virtual grounding lines, and a transistor with a controlling terminal connected to word line, a first controlled terminal connected to the bit line and a second controlled terminal selectively floated or connected to one of the grounding line, the first virtual grounding line, the second virtual grounding line or the bit line based on a value of data programmed into two bit cells (Fig.6).

Art Unit: 2818

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q Nguyen whose telephone number is (703) 308-4897. The examiner can normally be reached on 7am-6pm (EST).

Art Unit: 2818

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (703) 308-4910. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
